

VIS-HCM Dynamic Vocal Microphone with Microphone Stand

Introduction

The vertical conference microphone can be used in conferences, speeches and chorus.

The microphone uses two $\varnothing 14$ imported gold-plated membrane microphones, with a wide range of sound pickup, clear, crisp and transparent sound quality. The appearance design is customized according to human engineering, more intuitive and more user-friendly.

Parameter

Transducer mode: single capacitor type

Frequency response (Hz): 30Hz-16KHz

Directionality: heart-shaped direction

Output impedance (ohm): balanced 75Ω

Sensitivity: $-43\text{dB} \pm 2\text{dB}$ * Supply voltage (V): phantom 48V

Adjustable height: 0.1m — 1.65m

Anti mobile phone, electromagnetic and high frequency interference

Specifications of the base of the vertical speech microphone mm: conical diameter 240, height 60
