

## VIS-PR12B 12 inch subwoofer

### *Introduction*

The passive labyrinth subwoofer enclosure is compact and small, featuring a labyrinth design that offers high dynamics and excellent damping control, effectively managing distortion at high power levels. Both sides of the enclosure are equipped with ergonomically designed handles for easier handling. Not only does it boast extremely efficient performance and robust, solid ultra-low frequency output, but it also delivers incredibly fast transient response! Whether used in small live performances or entertainment venues, it demonstrates exceptional performance and playback capabilities.

Applicable: ★ Conference room ★ Multi-function hall ★ Concert hall ★ Wedding venue ★ Banquet hall

### *Technical parameters:*

Electroacoustic parameters

Frequency response 40Hz-800Hz ( $\pm 3$ dB) 1watt@1m

Sensitivity 95dB/W (1m)

Maximum sound pressure level 121dB MAX

Impedance 8 $\Omega$

Rated power 500W Nominal

The system recommends a power of 750W Continuous

Peak power 1200W Peak

Physical parameters

System type Single 12 inch maze bass

12-inch woofer x 1

Material: high strength plywood

Surface treatment high strength spray paint

Colour black

Box size 360H x 500W x 400D (unit: mm)

Net weight 20kg/only
